STORAGE DURATION

The ED2404 and ED2808 records up to 120 or 240 images per second at standard resolution (30-ips per channel) and the tables illustrate a typical recording duration for CIF, 2CIF and D1/960H record resolutions with a single video input, with continuous video recording and no audio for the recorder with a 2TB hard disk drive. The actual storage duration will vary depending on the number of cameras recorded, the image quality selected, the recording speed, recording schedule, motion content of the images and the number of stored events.
